

Truss Worksheet

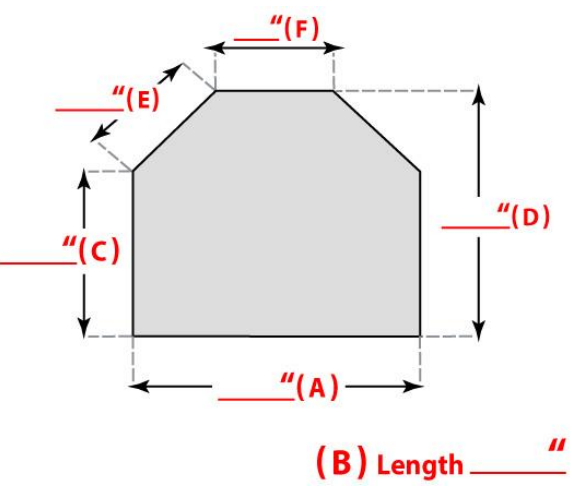

Thank you so much for your interest in our products. It's exciting to create a new project for your home, and we are happy to help you.

We supply the materials to create your truss and we assist you in the planning and product estimation. A local contractor or builder can use our installation instructions and custom information to build the truss in your home. After purchase, we will provide a materials breakdown list, cut sheet, and install support.

Please answer ALL questions below to get your project moving forward.

#1 What are the measurements of your room in inches? (see diagrams below)
